Probiotics And Crying Kids (PACK) Study

Got a Very Fussy Baby?

Your baby may be eligible to take part in the **PACK** study if…

- Your baby is between 3 to 15 weeks of age

- Your baby experiences ongoing crying and/or fussiness for a minimum of 3 hours per day during at least 3 days per week (for at least one week).

Participants will receive a $50 gift card at each follow-up visit.

The PACK study will test whether a dietary supplement called probiotics will decrease crying and/or fussiness in babies who cry for more than 3 hours per day, three times per week
