

Pregnant Women and their Newborns Needed to Help Prevent Asthma!

Join the TIPS Study

TIPS (Trial of Infant Probiotic Supplementation to Prevent Asthma) is a research study with the goal of preventing asthma in children by giving them a nutritional supplement called probiotics.

We're looking for prospective parents either of whom have a history of asthma.

Have Questions? Call or email us for more information.

What are probiotics?

Often called "good bacteria," probiotics are "live microorganisms which when administered in adequate amounts confer a health benefit on the host." Probiotics are commonly found in fermented food products such as yogurt.

The TIPS team works hard to make the study as convenient as possible for participants. We can even meet you in the comfort of your own home.
